

## What Are Fitzpatrick Skin Types?

The Fitzpatrick Scale is a classification system that categorizes skin types based on their reaction to sun exposure, specifically their tendency to burn and tan.

## Why choose Radiant Pulse?

At Radiant Pulse, we blend medical-grade technology with a luxurious, welcoming experience. Our certified professional provides personalised, high-performance skin solutions in a safe and inclusive environment.

We proudly use Lynton Technologies, the UK's leading manufacturer of aesthetic laser systems. Our choice of the 3JUVE® Dynamix platform ensures each treatment is effective, customisable, and clinically backed.

## Our Treatments

### Laser Hair Removal

Long-lasting, virtually pain-free hair reduction for face & body.  
Safe for Fitzpatrick skin types I-IV.

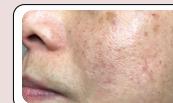

### IllumiFacial®

Next-gen photofacial that targets redness, pigmentation, and dull skin.  
Immediate glow, zero downtime. Safe for Fitzpatrick skin types I-V.

### Pigmentation Treatment

Treat sunspots, age spots, freckles, and uneven tone using IPL ReBright technology. Safe for Fitzpatrick skin types I-IV.

### Acne Treatment

Control breakouts, reduce inflammation, and clarify skin using light-based, non-invasive treatment. Safe for Fitzpatrick skin types I-IV.

### Thread Veins/Rosacea Treatment

Target facial veins, rosacea, spider veins, and redness with precise IPL technology. Safe for Fitzpatrick skin types I-IV.

### Resurfacing Treatment

Smooth fine lines, acne scars, and uneven texture. Stimulates collagen for radiant, refined skin. Safe for Fitzpatrick skin types I-V.
